#### FULL STACK WEB DEVELOPER

I am a seasoned problem solver who thinks outside the box but can still color inside the lines. I am steadfast in pursuit of a goal, I enjoy working hard, solving interesting puzzles, and I have fun doing it. I also understand how teams work and can engage effectively at any level from team member to team lead; I believe in clear, precise communication and I listen as carefully as I speak. I learned early in my automotive services career how mechanical systems work and later as a non-profit leader how service organizations work as systems; in both worlds I have used my skills to help others, which is the common thread. Getting back into software development has woken up my technical, logical approach to problem solving and ties it to my desire to empower others with information so they're able to make the best decisions for themselves.

#### **SKILLS SUMMARY**

- Leading by Example / Mentoring
- Empowering Others
- Maximizing Team Performance
- Creative Problem Solving
- Systems Thinking

- Data-Driven Decision Making
- Communicating with Clarity & Precision
- Active Listening
- Translating Technical Information to Non-Tech
- P&L Management

## **EXPERIENCE**

Park Burlington Burlington, VT Mar 2020 – Present

City Council-approved project to implement the Downtown Parking Improvement Initiative; a public/private partnership between the Burlington Business Association (BBA) and the Department of Public Works (DPW) addressing downtown parking issues.

## **Developer (Capstone Project – Burlington Code Academy)**

Working with representatives of BBA, DPW, and a 4-person student team to develop a mobile-friendly interactive map that provides users with information regarding parking options including costs, parking duration, and distance to their destination, with the overall goal of educating users on the parking options in downtown Burlington and changing the public perception.

• Using Google Maps API, Firebase, JavaScript, and Node

#### **Connecting Solutions of Vermont, Inc.**

Waterbury, VT

Jun 2018 - Jan 2020

IT support business maintaining computer networks for small and mid-size businesses.

#### **Project Manager –Software Implementation**

Hired on a contract basis and transitioned to full time temp in Nov 2018. Created a functional office structure including rebuilding the chart of accounts to support business decision making, redesigning A/P and A/R, and transitioning Payroll to outside firm. Configured ConnectWise Manage software to support operations, integrated it with existing accounting package, and launched.
